

## The ArdentA difference – today and tomorrow

Our mission is to ensure the enterprise information systems that your organisation depends on are designed, implemented and maintained at optimum levels.

How? Through the use of advanced diagnostic, tuning, specification and supply and technical support services. We also provide innovative and effective solutions built on years of expertise in working with Linux, UNIX and database systems.

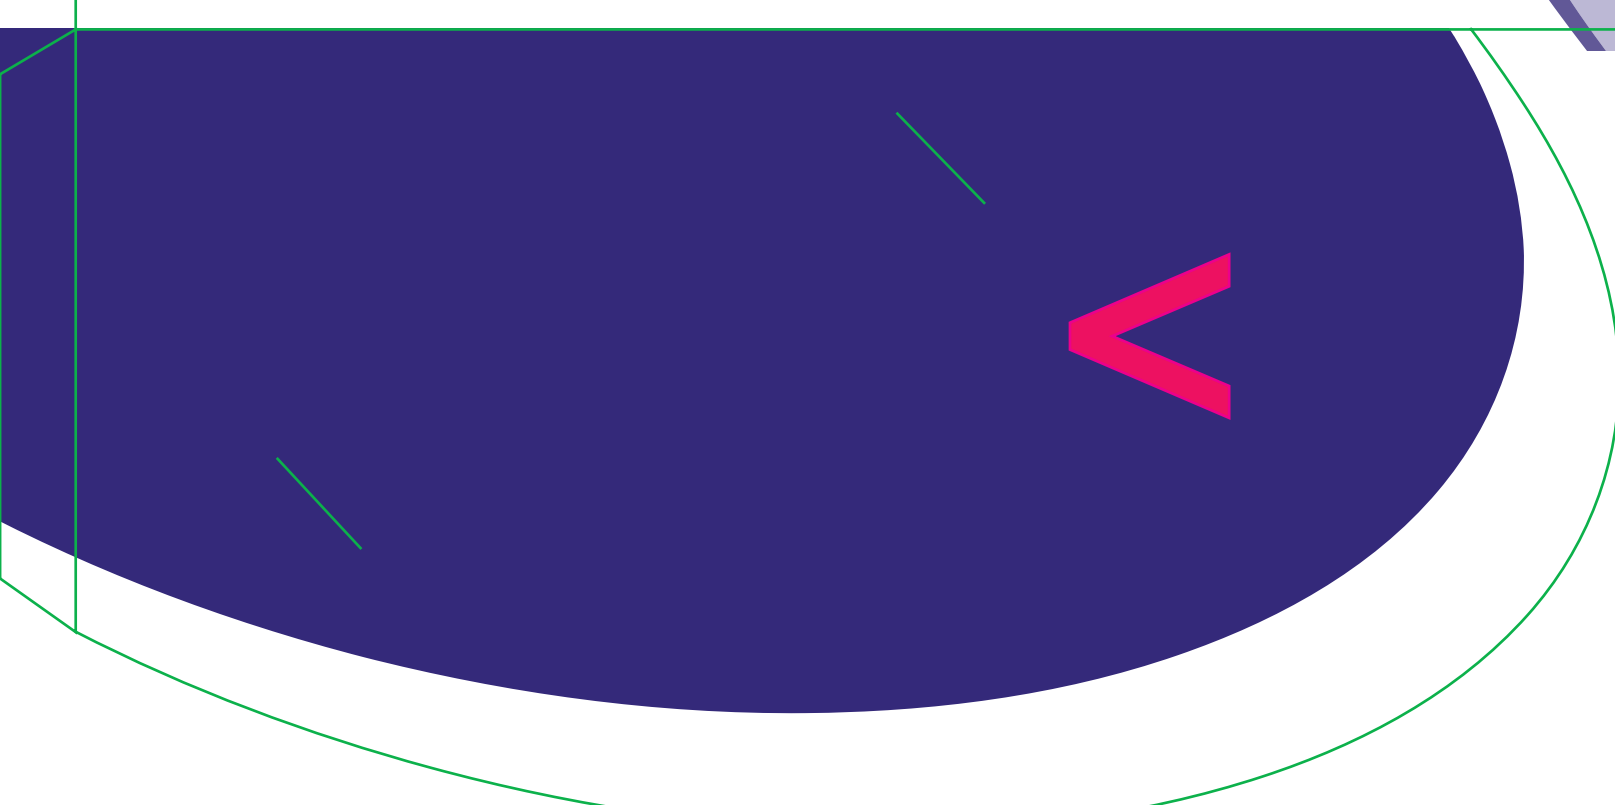

Our expert engineers are dedicated to delivering vital implementation services such as Storage Area Network architecture, High Availability System Design and Supply and Managed Services such as Hosting, Backup and Recovery, Disaster Recovery and (using our ground-breaking service SystemAngel) Remote Monitoring.

**If you could benefit from the peace of mind that comes with knowing the systems underpinning your organisation are being constantly maintained at a level of peak efficiency, call us today on 0870 765 7560.**

## Maximising enterprise information systems

# Ardenta:

the UK's specialist in delivering  
**highly-tuned information systems**  
for the enterprise

Ardenta designs, implements, maintains and supports mission-critical systems for organisations who depend on high-performance solutions.

If you're looking to squeeze every last drop from your hardware, or need to implement a state-of-the-art storage solution to support your growing business, we can help ensure your enterprise infrastructure is working at maximum effectiveness.

Our team of highly skilled, industry-certified staff specialise in constructing company-wide solutions and are experienced in working with the very best enterprise technology platforms – including IBM, EMC<sup>2</sup> and HP.

We're experts in optimising the value of UNIX and Linux-based systems, and have worked in relational database administration for over a decade. We're also an authorised IBM Premier Business Partner, EMC<sup>2</sup> Velocity<sup>2</sup> Associate Partner and HP Authorised Reseller.

## **Innovative solutions to back up mission-critical systems**

To help you make the most of your systems, we have developed a unique process we call Ardentation. This service will bring your enterprise information operations to a peak level of performance and productivity, and keep them there.

We design and implement storage solutions to help our customers gain control over all their contemporary and legacy data issues.

Our business-driven approach to storage enables you to develop towards full Information Lifecycle Management (ILM).

If you're running complex or multiple systems, our managed service and hosting options can relieve operational headaches, and free you to focus on the business.

Whatever your need, we'll maximise the performance of your enterprise information operations, through advanced diagnostic, tuning and technical support services, provided by some of the finest technical experts in the industry.

**That's the Ardenta difference.**

## Hear what our customers say...

> *"Ardenta's strength is their ability to work well with the Customer. The recent establishment of MBL is a case in point, where Ardenta provided strong support and project skills around the key changes both technically and from a business position. This builds on four years of service delivery for Londis and I am very pleased with Ardenta's responsiveness through a sensitive time of change and their contribution in the early stages of 'Musgrave Budgens Londis'. The organisational change of MBL has allowed Ardenta to shine."*

**Nicola Duckett – IS Director, Musgrave Budgens Londis**

> *"Our system is mission critical and needs to be up and running 24x7. Ardenta went the extra mile to ensure that this was the case, rapidly organising a local, remote place for our new system which required testing whilst we continued smooth running of our operation. We found that during our project, no problem was too great for Ardenta. We were impressed with the company's attention to detail, commitment and professionalism. Even at off-peak hours when we have asked for assistance with issues not directly the responsibility of Ardenta we have found them to be highly responsive. We regard Ardenta as a partner we can continue to use to meet our future business requirements."*

**Andy Wrightson – Head of IT, Clyde and Co.**

> *"Ardenta's extensive knowledge of Linux and Storage Area Networking made them an ideal partner to help us to address our storage issues. The SAN they recommended shows that they understood our needs well."*

**Steve Thomson – Finance and IT Director, Greenpeace UK**

> *"We now know that when we need specialist Informix skills Ardenta can provide efficient and relevant expertise."*

**Navjot Wyld – Head of  
Software Development  
ITV Broadcasting**
