

We'll do more than deliver your solution. We'll guarantee it 'performs at its peak'

For companies that depend on high performance cost effective IT infrastructure, Ardenta's professionals build, deliver and manage company-wide solutions on the best enterprise technology platforms. Should you choose

not to opt for our fully Managed Services, you can still call on our Professional Services skills to put into place your solution, while also making certain it operates at peak performance levels.

We translate your business requirements into best-in-class solutions

We translate your business requirements into the best technical specifications, working as a part of your team, implementing the most effective best-in-class technical solutions for your organisation, including:

- Private Cloud design and implementation
- Server and operating system provisioning

- Virtualisation design and implementation
- Storage Area Network design and implementation
- Data centre network design and implementation
- Backup and Recovery design and implementation
- Disaster Recovery planning
- Technical Project Management
- And more ...

Distinguished by Professional Services and technical excellence

Our experts are well versed in working with customer teams to deliver the optimum solutions for you. Ardenta's Professional Service experts will then work closely with you to ensure that the highest performance levels for your enterprise information systems.

Through their expertise, we deliver

optimised IT infrastructures with the highest levels of reliability, resilience, availability and performance. Working across a wide range of platforms – including IBM, EMC, HP, UNIX and many others – we 'highly tune' your systems through use of advanced diagnostics, tuning, specification and supply, as well as technical support services.

Benefit from our years of experience and expertise

At Ardenta, our team of Professional Services experts has a proven track record in delivering solutions for customers the world over. Our customers include:

- BBC • British Colombian Lottery Corporation • BUPA • Jenningsbet • ITV • The Health Lottery

As a Trusted Advisor, with our Professional Services expertise, we will implement solutions that:

- Drive down your operating costs
- Achieve reliability and performance for all your IT infrastructure needs.
- Give you the most 'highly tuned' operating environment.

"During our dealings with Ardenta we have always been impressed with their expertise, professionalism, costs and speed of response. We always go to them first, and would recommend that others did too!"

Adam Livingstone, CIMA
(Chartered Institute of Management Accountants)

Experience, expertise, excellence

Our Professional Services experts come with years of experience, putting into place solutions for:

- Operating System Support
- Remote DBA - Informix, DB2, Oracle, SQL Server and other databases
- Remote Storage Administration
- x86 Infrastructure Virtualisation Support
- System Angel – monitoring your infrastructure
- Security Monitoring
- Network Support
- Internet Traffic Management
- And more ...

Once your solution is delivered, you may wish to ensure its ongoing management, support and maintenance using our Managed Services. For more information see our Managed Services data sheet.
